ABOUT ME

B.Tech in Computer Science and Engineering graduate and passionate Frontend Developer with hands-on experience in ReactJS/NextJS. Seeking a Front-end Developer position to contribute dynamic, responsive user interfaces and write clean, maintainable code in a collaborative team environment."

EXPERIENCE

Frontend Developer

Gloitel IT

- Gained hands-on experience building interactive, component-driven user interfaces for both web and mobile applications using Next.js and React Native.
- Applied core concepts such as JSX, props, state management, hooks, navigation, and TypeScript to develop scalable and maintainable frontend features.
- Strengthened understanding of modern frontend engineering practices, including responsive UI design, mobile-first development, API integration, performance optimization, and clean code architecture.

PHP Web Development

Logixhunt

- Developed a dynamic website using PHP and MySQL as part of a collaborative team project.
- Designed and implemented robust back-end architecture, including database schema creation and server-side logic.
- Presented the final project to the tutor, showcasing core features and explaining solutions to technical challenges encountered during development.

PROJECTS

Nashamukti (De-addiction & Rehabilitation Platform)

- Developed and maintained the admin web application using Next.js, React, and TypeScript, creating responsive dashboards, user management modules, and workflow-driven interfaces with seamless API integration.
- Contributed to the mobile application using React Native, implementing core features while ensuring consistent UI/UX, optimal performance, and smooth navigation across multiple devices and screen sizes.
- Addressed real-world challenges such as complex form handling, role-based access flows, state management, and API error handling to improve reliability and user experience.
- Optimized application performance by improving component reusability, reducing unnecessary re-renders, and ensuring efficient data fetching and rendering.
- Collaborated closely with backend and design teams to translate business requirements into scalable, maintainable, and production-ready frontend solutions following modern best practices.

NextJS, TypeScript, TanStack, TailwindCss, API Integration, ShadCN, ReactNative<https://nashamuktis.com/>

Gloitel (Company Website)

- Designed and developed the company's main corporate website with unique and modern UI elements, focusing on visual identity, usability, and brand consistency.
- Implemented responsive layouts and interactive components using React, Next.js, and TypeScript, ensuring cross-device compatibility and performance optimization.

React, NextJS, TailwindCss, TypeScript,

Fitbattle (Fitness Challenge Platform – Landing Page)

- Designed and developed the Fitbattle landing page to promote a fitness challenge platform and encourage user participation.
- Implemented responsive layouts and interactive sections using Next.js, React, and TypeScript, focusing on performance, SEO, and cross-device compatibility.
- Translated product and marketing requirements into a visually engaging, brand-consistent web experience aligned with the company's vision.

React, NextJS, TailwindCss, TypeScript,

<https://fitbattle.in/>

IMDB Movie Database Website (Personal Project)

- Developed a responsive and interactive movie database website using ReactJS, mimicking the core functionality of IMDb.
- Integrated third-party movie API to fetch real-time movie data, including titles, posters, ratings, and descriptions.
- Implemented features like search functionality, routing with React Router, and dynamic rendering of movie details.
- Focused on clean UI/UX design with responsive layouts and smooth user interactions.

ReactJS, HTML, CSS, JavaScript, API Integration <https://movie-out.vercel.app/>

SmartTime (Website Design & Development)

- Designed and developed the SmartTime website with a clean, intuitive, and user-centric interface, emphasizing usability and modern design principles.
- Built responsive and performant UI components using React, Next.js, and TypeScript, ensuring consistency across devices and browsers.

ReactJS, OpenAI API (DALL·E), JavaScript, HTML, CSS

Personal Portfolio Website

- Built a responsive portfolio using ReactJS to showcase projects like an IMDb Movie Clone and an AI Image Generator. Each project includes descriptions, live demos, and GitHub links. Designed with smooth navigation and a clean, modern UI.

ReactJS, HTML, CSS, JavaScript

AI Image Generator (Personal Project)

- A web-based AI image generator using ReactJS, integrated with OpenAI’s DALL·E API to generate images from user prompts.
- Implemented dynamic form handling for user input and displayed generated images.
- Handled API requests, loading states, and error handling for a smooth user experience.
- Focused on clean, modern UI with responsive design and interactive elements.

ReactJS, OpenAI API (DALL·E), JavaScript, HTML, CSS

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript
- **Web:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Mobile:** React Native
- **State Management & Data Fetching:** TanStack Query (React Query), Redux
- **UI Libraries:** shadcn/ui, Ant Design
- **Version Control:** Git, GitHub
- **Tools:** Postman, Figma
- **APIs:** REST APIs

EDUCATION

CCET BHILAI (CSVТУ) 2020 - 2024 2018 - 2020 National Convent School

Computer Science and Engineering Central Board of Secondary Education
